

Eli Huffman

Junior Frontend Developer | React | Next.js | TypeScript | Tailwind CSS

eliwhuffman@gmail.com | +1-704-433-1375 | Salisbury, NC, USA | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Summary

Junior Frontend Developer who builds responsive, user-focused web applications with React, Next.js, and TypeScript. Frontend Simplified graduate and Computer Science graduate with hands-on experience shipping real projects, from a real-time skin analysis app to an NFT marketplace and a browser-based RPG. Comfortable turning Figma designs into clean, accessible interfaces, integrating REST and third-party APIs, and writing readable, maintainable code.

Technical Skills

Languages & Web: JavaScript (ES6+), TypeScript, HTML5, CSS3, Semantic HTML, Responsive Design

Frameworks & Libraries: React, Next.js, Tailwind CSS, Redux, React Query, React Hook Form, Zustand

Backend & APIs: Firebase, REST APIs, Node.js, Express, Stripe

Tools & Platforms: Git, GitHub, Vite, Vercel, Netlify, npm, Figma

Experience

Skinstric AI (Remote)

Jul 2026 - Jul 2026

Frontend Engineer

- Built a real-time skin analysis web app in Next.js, integrating the OpenAI Vision API to classify skin conditions from user-uploaded images.
- Developed a responsive component library and animated recommendation cards in CSS, and optimised load times with Next.js Server Components.

Freelance (Remote)

Jan 2026 - Present

Freelance Software Engineer (Front-end)

- Design and build custom websites and web applications for clients in React and Next.js, owning work from scoping through deployment and maintenance.
- Translate client requirements and Figma designs into responsive, accessible interfaces deployed on Vercel and Netlify.

Team Hyperborea (Remote)

Jun 2024 - Present

Co-Founder & Developer

- Co-founded and coordinate a distributed volunteer team of 30+ developers and designers, delegating tasks and shipping collaborative web and game projects.

Projects

NFT Marketplace | [Live Demo](#) | [GitHub](#)

- Next.js and TypeScript: real-time NFT marketplace with collection browsing, advanced filtering and sorting, skeleton loading states, and live expiration timers.

Dungeon Diver | [Live Demo](#) | [GitHub](#)

- React and Firebase: browser-based RPG with a dynamic game-config system that lets non-developers update monster stats, locations, and game logic via a backend interface.

YouTube Clone | [Live Demo](#) | [GitHub](#)

- React and YouTube API: responsive video streaming interface with dynamic routing for video details, comments, and embedded playback.

Education

Frontend Simplified

Jun 2026 - Aug 2026

Front-End Development Certificate

University of North Carolina at Charlotte

2021 - 2023

Bachelor of Science, Computer Science
